

IMPLANT SURGERY

NARHAM
EXCELLENCE IN INSTRUMENTATION

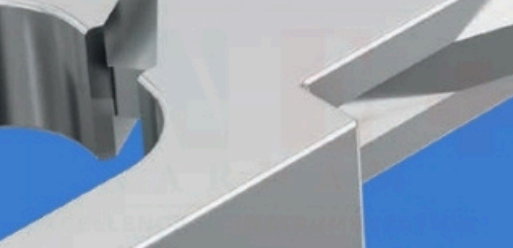

RECOVERY OF TOOTH FRAGMENTS THROUGH SURGERY

In the last decade, implantology has become an important part of clinical practice, helping dentists improve the quality of life of their patients. While implants might often be a convenient alternative to conventional treatment options, in certain cases, it is mandatory for the rehabilitation of functional, anatomical or aesthetic problems arising from tooth loss.

SS Dental has developed a number of highly functional and easy-to-use instruments to help

qualified dentists tackle even the most challenging clinical cases and to effectively and fully deliver all the advantages of implant surgery, including a high degree of stability, the preservation of bone in the alveolar process, and long-term results. Our proficiency with design and manufacturing has led to educational collaboration with major dental institutions to grow competency in this branch among dental professionals.

HOW TO USE THE INFORMATION

- CP-12 — model + scientific
- RC0702-12 — name SS Dental code
- SSWave RC — handle option

SSLady

products ergonomically designed for women's hands:

- smaller and lighter handles
- smaller finger holes
- reduced size

code starts with "W" or "SW"

these products are not manufactured by SS Dental and are distributed with the manufacturer's brand
